

Technical labelling

for chemical products

The product may get into contact with all types of process systems and process media. May thus be used on the inside of the systems. Residues do not need to be removed.

The product may get into contact with all types of process systems and process media. May thus be used on the inside of the systems. Residues must be removed from the inside of the systems. On the outside of the systems residues do not need to be removed.

The product may get into contact with the outside of process systems. Residues must however be removed.

The product may not get into contact with the inside nor the outside of the process system.

The product may not be used in controlled areas or on the PWR-turbine side.

Contains operational-, laboratory- and firefighting chemicals, gases and products used for surface protection (TBY).

Entry of chemical products is only allowed after approval and registration.
