

# Interim report January–June 2021

## Business highlights, April–June 2021

- Agreement on sale of 49.5% of the Hollandse Kust Zuid offshore wind farm
- Approval by Germany's Bundestag of compensation for nuclear plant closures which affected results in the second quarter by SEK 11.1 billion
- Decision by Swedish Parliament on special investment scope for electricity grid investments

## Important events after the balance sheet date

- Sale of electricity distribution business Stromnetz Berlin completed on 1 July. The purchase price was EUR 2.1 billion and the transaction will impact the results in the third quarter

## Financial highlights, January–June 2021

- Net sales increased by 1% (5% excluding currency effects) to SEK 80,465 million (79,440)
- Underlying operating profit<sup>1</sup> of SEK 17,308 million (12,982)
- Operating profit<sup>1</sup> of SEK 29,595 million (5,287)
- Profit for the period of SEK 23,635 million (-1,594)

## Financial highlights, April–June 2021

- Net sales increased by 10% (14% excluding currency effects) to SEK 34,554 million (31,280)
- Underlying operating profit<sup>1</sup> of SEK 5,256 million (2,792)
- Operating profit<sup>1</sup> of SEK 16,210 million (-7,027)
- Profit for the period of SEK 13,212 million (-8,495)

## KEY DATA

Amounts in SEK million unless indicated otherwise	Jan-Jun 2021	Jan-Jun 2020	Apr-Jun 2021	Apr-Jun 2020	Full year 2020	Last 12 months
Net sales	80 465	79 440	34 554	31 280	158 847	159 872

1) See Definitions and calculations of key ratios for definitions of Alternative Performance Measures.

2) Sales of electricity also include sales to Nord Pool Spot and deliveries to minority shareholders.

3) Last 12-month values.

## CEO's comment

# A strong result and a development that drives the transition for Vattenfall and our customers

Vattenfall reports a strong result for the first half of the year, with higher contributions from both production and sales of electricity and heat. Strategic agreements have been entered into in which we are working together with partners to drive the energy transition. We can finally also put a number of prioritised legal matters behind us and instead look forward with focus on our core businesses and our customers.

### Comparison affected by large one-off items

Profit for the period totalled SEK 23.6 billion for the first half of the year and SEK 13.2 billion for the second quarter. In Germany we have been entitled for some time to compensation for the country's nuclear power phase-out. This has now been approved by Germany's Bundestag, with an earnings impact of SEK 11.1 billion in the second quarter. Payment will be made in the fourth quarter.

### Strong performance for operating activities in a market with higher electricity prices

The market is experiencing wide fluctuations, and electricity prices in the Nordic countries have had a strong recovery since last year's historically low levels. Unusually cold weather during the first quarter of the year was followed by low precipitation during the second quarter. On the Continent we are seeing the impact of higher prices for fuel and CO<sub>2</sub> emission allowances. All in all, the impact of the higher electricity prices was positive for Vattenfall during the first half of the year. However, large differences between price areas and the system price in the Nordic countries pressed down the price achieved after hedges, which was especially noticeable during the second quarter.

The operating activities performed well. Underlying operating profit increased by SEK 4.3 billion to SEK 17.3 billion for the first half of the year and by SEK 2.5 billion to SEK 5.3 billion for the second quarter. Supported by high availability of nuclear power and favourable reservoir

levels, we increased electricity generation despite the closure of Ringhals 1 at the end of 2020. We are also seeing positive development for both the sales and heat businesses. Plus we reported a higher realised profit from trading.

### Clear path forward for operations in Berlin

After the close of the second quarter we completed the transaction for the sale of the distribution business in Berlin (Stromnetz Berlin). We also received the positive and final ruling from the Higher Administrative Court in Berlin that the district heating network belongs to Vattenfall after the city made a claim to take over the network. We are now looking forward to continued good cooperation with the City of Berlin to achieve our joint climate targets.

### Partnerships support the energy transition of our customers

Achieving our goal of enabling fossil-free living within one generation requires that we cooperate with customers and other partners – also outside of the energy sector. Partnerships therefore have a central role in Vattenfall's strategy. Accordingly, we are now selling 49.5% of the Hollandse Kust Zuid offshore wind farm to BASF. This is the first time a major industrial company is buying a substantial stake in one of our large-scale wind farms. Together we will be able to both reduce emissions in the chemical industry and deliver fossil-free electricity to our customers with a project that contributes to the energy transition. I am truly looking forward to this cooperation, which is unique.

# Group overview

## Customer sales development

Sales of electricity to customers, excluding sales to Nord Pool Spot and deliveries to minority shareholders, increased by 0.6 TWh to 60.2 TWh (59.6), owing to higher volumes in the Nordic countries. Lower sales in the B2B segment in France had a countering effect. Sales of gas increased by 2.5 TWh to 34.4 TWh (31.9), mainly owing to colder weather in the Netherlands and Germany. Sales of heat increased by 1.3 TWh to 9.2 TWh (7.9).

### CUSTOMER SALES (TWh)

## Generation development

Total electricity generation increased by 1.7 TWh to 58.8 TWh (57.1) during the first half of 2021. Higher nuclear power (+1.5 TWh) and hydro power (+0.9 TWh) generation was countered by lower wind power (-0.4 TWh) and fossil-based (-0.2 TWh) power generation.

### ELECTRICITY GENERATION (TWh)

## Price development

Average Nordic electricity spot prices were 647% higher, at EUR 41.9/MWh (5.6) during the second quarter of 2021 compared with the corresponding period in 2020, mainly owing to a lower hydrological balance and higher prices for electricity on the Continent, some of which was imported to the Nordic countries. Prices in Germany were 197% higher, at EUR 61.1/MWh (20.3), and prices in the Netherlands increased by 197% to EUR 62.1/MWh (20.9). Electricity prices in Germany and the Netherlands were mainly affected

by lower wind speeds and higher prices for fuel and CO<sub>2</sub> emission allowances. Electricity futures prices for delivery in 2022 and 2023 were 5%–51% higher than in the second quarter of 2020.

Compared with the second quarter of 2020, the average spot price for gas was 363% higher, at EUR 24.7/MWh (5.3). The spot price for coal was 111% higher, at USD 89.6/t (42.5). The futures price for gas was 48% higher, at EUR 20.8/MWh (14.0), and the futures price for coal was 30% higher, at USD 78.6/t (60.2). The price of CO<sub>2</sub> emission allowances was 137% higher, at EUR 49.9/t (21.1).

### AVERAGE INDICATIVE NORDIC HEDGE PRICES (SE, DK, FI) AS PER 30 JUNE 2021

EUR/MWh	2021	2022	2023
	28	28	27

### VATTENFALL'S ESTIMATED NORDIC HEDGE RATIO (%) AS PER 30 JUNE 2021

### ACHIEVED NORDIC ELECTRICITY PRICES (SE, DK, FI)<sup>1</sup> EUR/MWH

Jan-Jun 2021	Jan-Jun 2020	Apr-Jun 2021	Apr-Jun 2020	Full year 2020
30	28	27	30	31

### SENSITIVITY ANALYSIS – CONTINENTAL PORTFOLIO (DE, NL, UK)

+/-10% price impact on future profit before tax, SEK million<sup>2</sup>

Market-quoted	2022	2023	2024	Observed yearly volatility <sup>3</sup>
Electricity	+/- 413	+/- 1,556	+/- 1,329	19%-24%
Coal	-/+ 5	-/+ 20	-/+ 11	20%-21%
Gas	-/+ 104	-/+ 860	-/+ 678	15%-24%
CO <sub>2</sub>	-/+ 19	-/+ 430	-/+ 370	40%-42%

- 1) Achieved prices from the spot market and hedges. Includes Nordic hydro, nuclear and wind power generation.
- 2) The denotation +/- entails that a higher price affects operating profit favourably, and +/- vice versa.
- 3) Observed yearly volatility for daily price movements for each commodity, based on forward contracts. Volatility normally decreases the further ahead in time the contracts pertain to.

## Net sales

**Comment January–June:** Consolidated net sales increased by SEK 1.0 billion (including negative currency effects of SEK 2.8 billion). The increase is mainly attributable to higher electricity prices and higher sales volumes in the Nordic countries and Germany. Lower sales in the B2B segment in France had a countering effect.

**Comment April–June:** Consolidated net sales increased by SEK 3.3 billion (including negative currency effects of SEK 1.0 billion). The increase is mainly attributable to higher electricity prices and higher sales volumes in the Nordic countries.

## Earnings

**Comment January–June:** Underlying operating profit increased by SEK 4.3 billion, which is explained by:

- A higher earnings contribution from the Power Generation operating segment (SEK +3.4 billion), mainly owing to higher prices achieved in the Nordic countries, higher generation from both nuclear and hydro power, and a higher realised trading result in the trading business.
- A higher earnings contribution from the Heat operating segment (SEK +1.0 billion), which is mainly explained by the closure of the Moorburg power plant in 2020 (lower operational costs and depreciations).
- Other items, net (SEK -0.1 billion).

Items affecting comparability amounted to SEK 12.3 billion (-7.7), of which most pertains to compensation for the closure of nuclear power operations in Germany<sup>1</sup> (SEK 12.5 billion) and unrealised change in market value for energy derivatives and inventories (SEK 2.9 billion). An increase in provisions for nuclear power in Sweden and Germany (SEK -2.5 billion) had a countering effect. Profit for the period totalled SEK 23.6 billion (-1.6) and was affected by – in addition to items affecting comparability – higher net financial items resulting from a higher return from the Swedish Nuclear Waste fund and a higher tax cost associated with higher profit before tax.

**Comments April–June:** Underlying operating profit increased by SEK 2.5 billion, mainly owing to positive contributions from the Power Generation (SEK 1.6 billion), Wind (SEK 0.5 billion) and Heat (SEK 0.5 billion) operating segments. Items affecting comparability amounted to SEK 11.0 billion (-9.8), of which most pertains to compensation for the closure of nuclear power operations in Germany (SEK 11.1 billion) and unrealised

changes in market value for energy derivatives and inventories (SEK 2.6 billion). An increase in provisions for nuclear power in Sweden and Germany (SEK -2.5 billion) had a countering effect.

Profit for the period totalled SEK 13.2 billion (-8.5), where the positive effect of items affecting comparability was countered by a higher tax cost associated with higher profit before tax and lower net financial items resulting from a lower return from the Swedish Nuclear Waste fund.

## Cash flow

**Comment January–June:** Funds from operations (FFO) increased by SEK 4.8 billion, mainly owing to a higher operating profit before depreciation, amortisation and impairment losses (EBITDA). Compensation for the closure of nuclear power operations in Germany is not included in FFO (included as an adjustment of the item "Other, incl. non-cash items"). Cash flow from changes in operating capital amounted to SEK 13.7 billion. The largest contributing factors were changes related to the net change in margin calls (SEK 23.6 billion), CO<sub>2</sub> emission allowances (SEK -1.9 billion), the net change in operating receivables and operating liabilities attributable to seasonable effects in the Customers & Solutions and Heat operating segments (SEK -3.5 billion), and an increase in inventories (SEK -2.9 billion).

**Comment April–June:** Funds from operations (FFO) increased by SEK 3.0 billion, mainly owing to a higher operating profit before depreciation, amortisation and impairment losses (EBITDA), but with a countering effect from higher paid tax. Cash flow from changes in operating capital amounted to SEK 16.6 billion, which is mainly explained by the net change in margin calls (SEK 18.6 billion) and the net change in operating receivables and operating liabilities attributable to seasonable effects in the Customers & Solutions and Heat operating segments (SEK 1.9 billion). An increase in inventories had a negative effect (SEK -2.5 billion).

## Important events after the balance sheet date

- On 1 July 2021 the sale of the electricity distribution company Stromnetz to the City of Berlin was completed. The purchase price was EUR 2.1 billion (SEK 21.2 billion). The capital gain is estimated to EUR 0.6 billion, with earnings impact in the third quarter.

1) See Note 4, Items affecting comparability, page 27

## KEY FIGURES – GROUP OVERVIEW

1) See Definitions and calculations of key ratios for definitions of Alternative Performance Measures.

## Capital structure

Cash and cash equivalents, and short-term investments increased by SEK 0.7 billion compared with the level at 31 December 2020. Committed credit facilities consist of a EUR 2.0 billion Revolving Credit Facility that expires in November 2023. As per 30 June 2021 available liquid assets and/or committed credit facilities amounted to 46% of net sales. Vattenfall's target is to maintain a level of no less than 10% of consolidated net sales, but at least the equivalent of the next 90 days' maturities

Net debt and adjusted net debt decreased by SEK 15.8 billion to SEK 32.3 billion and by SEK 17.0 billion to SEK 104.5 billion, respectively, compared with the levels at 31 December 2020. These decreases are mainly attributable to a positive cash flow after investments (SEK 24.4 billion). Higher provisions for nuclear power (net) increased adjusted net debt by SEK 2.2 billion. Paid dividend also impacted net debt (SEK 5.1 billion).

### NET DEBT

### ADJUSTED NET DEBT

## Strategic focus areas and targets for 2025

Strategic focus area	Targets for 2025	Q2 2021	Outcome 2020
Driving decarbonisation with our customers & partners Securing a fossil-free energy supply	1. Customer engagement, absolute Net Promoter Score (NPS) <sup>1</sup> : <b>+18</b>	-	<b>+7</b>
	2. CO <sub>2</sub> emissions intensity <sup>2</sup> : <b>≤86 gCO<sub>2</sub>e/kWh</b>	<b>87</b>	<b>97</b>
Delivering high-performing operations	3. Funds from operations (FFO)/adjusted net debt: <b>22%-27%</b>	<b>38.1%</b>	<b>28.8%</b>
	4. Return On Capital Employed (ROCE), last 12 months: <b>≥8%</b>	<b>14.5%</b>	<b>5.8%</b>
Empowering our people	5. Lost Time Injury Frequency (LTIF) <sup>3</sup> : <b>≤1.0</b>	<b>1.7</b>	<b>1.8</b>
	6. Employee engagement index <sup>4</sup> : <b>≥75%</b>	-	<b>72%</b>

1) Absolute NPS is weighted 80% from Customers & Solutions and 20% from Heat, which corresponds to our customer composition. Reported on an annual basis.

2) Includes CO<sub>2</sub> and other greenhouse gases, such as N<sub>2</sub>O and SF<sub>6</sub>. Consolidated value. The target for 2025 is to be on track to achieving the 1.5° C target by 2030, in accordance with SBT.

3) Rolling 12-month values. LTIF (Lost Time Injury Frequency) is expressed in terms of the number of lost time work injuries per 1 million hours worked. The metric pertains only to Vattenfall employees.

4) Documentation for measurement of target achievement is derived from the results of an employee survey, which is conducted on an annual basis.

1) "Other" pertains mainly to all Staff functions, including Treasury and Shared Service Centres.

## Customers & Solutions

*The Customers & Solutions Business Area is responsible for sales of electricity, gas and energy services in all of Vattenfall's markets.*

### Strong earnings performance and continued progress in charging solutions

- Continued customer growth in Germany along with low churn and lower temperatures contributed to strong earnings
- E-mobility partnership with Coca-Cola in Germany

**Q1–Q2:** Net sales increased by 8%. Underlying operating profit increased by 34%, mainly owing to customer growth and lower average temperatures in the Netherlands and Germany. Colder weather in several of our markets had a positive effect on sales of electricity, mainly in the Nordic countries, while it contributed to increased sales of gas in the Netherlands and Germany. Compared with year-end 2020, the total customer base grew by 1.2% to 10.2 million contracts.

**Q2:** Net sales increased by 14%. Underlying operating profit increased by 74%, mainly owing to lower average temperatures in the Netherlands. Sales of electricity increased due to colder weather in the Nordic countries and the Netherlands, which was offset by lower volumes in the B2B segment in France. Sales of gas increased mainly due to lower temperatures in Germany and the Netherlands.

During the quarter, Vattenfall's e-mobility network Incharge reached the milestone of 25,000 connected charge points across Sweden, the Netherlands, Norway and Germany.

In Germany, Vattenfall partnered with Coca-Cola to enable electrification of the company's car fleet. Vattenfall will install the necessary infrastructure for the company's approximately 2,300 company car drivers, including charging points at workplaces and an offer to install charging stations at employees' homes.

The flexibility market is growing in Sweden, especially regarding a Frequency Containment Reserve – Disturbance (FCR-D). Vattenfall has been a pioneer in this area to enable its customers to support the system and benefit from their flexible assets. Vattenfall's Nordic portfolio now comprises approximately 20 MW plus an additional 40 MW that are contracted and awaiting approval by the Swedish transmission system operator (TSO) Svenska kraftnät.

### KEY FIGURES – CUSTOMERS & SOLUTIONS

## Power Generation

Power Generation comprises the Generation and Markets Business Areas. The segment includes Vattenfall's hydro and nuclear power operations, maintenance services business, and optimisation and trading operations including certain large business customers.

### Approval of compensation for closure of nuclear power operations in Germany

- Agreement on compensation for the closure of nuclear power in Germany approved by Bundestag
- Application to increase output at Forsmark 1
- Enhanced collaborations in SMR technology

**Q1–Q2:** Net sales increased by 10%. Underlying operating profit increased by 49% mainly as a result of higher achieved prices in the Nordic region (higher spot price, EUR +25/MWh, offset by a lower average hedging price, EUR -6/MWh), increased hydro (0.9 TWh) and nuclear power (1.5 TWh) generation, and a higher realised trading result.

Combined availability of Vattenfall's nuclear power plants during the first half of 2021 was 91.1% (78.9%). Higher availability and increased production in 2021 and down-regulations in 2020 due to low price levels compensated for lower volume resulting from the closure of Ringhals 1 at year-end.

Nordic reservoir levels were at 71% (64%) of capacity as per 30 June, which is 7 percentage points above the normal level.

**Q2:** Net sales increased by 13%. Underlying operating profit increased by 70% mainly owing to a higher realised trading result and higher nuclear power generation (2.6 TWh), which was partially offset by lower achieved prices in the Nordic countries (a lower average hedging price of EUR -6/MWh was partly countered by a higher spot price, EUR +26/MWh).

Germany's Bundestag (the lower house of Parliament) approved the agreement to compensate nuclear plant operators for losses incurred due to the country's nuclear phase-out. This affected profit for the second quarter by SEK 11.1 billion. Compensation is expected to be received and effect cash flow during the fourth quarter of 2021. The total compensation amounts to SEK 16.6 billion. Profit was affected by SEK 12.5 billion during first half of 2021 as production rights were sold in the first quarter. Sold

production rights in 2019 and 2020 (SEK 4.1 billion) as well as during the first quarter of 2021 have been deducted in the calculation of the compensation amount, which affected profit for the second quarter.

In connection with annual maintenance of Ringhals 3 in May, a fuel element became loose from its mooring. As a result, the maintenance outage has been extended until the end of August.

In June, Forsmark 1 applied to operate at a higher power level following completion of its annual maintenance in 2022. The new output would be 1,100 MW, entailing a capacity increase of approximately 10%. This increase corresponds to the annual electricity consumption of approximately 200,000 Swedish households.

In May Vattenfall signed an agreement with the Estonian company Fermi Energia to become a minority shareholder in the company. Vattenfall has previously been involved in a R&D-collaboration with the company within Small Modular Reactor (SMR) technology and the prospects for deployment of one or several such reactors in Estonia by 2035. Together with the Swedish nuclear power industry, Vattenfall is also supporting an application from several Swedish universities to establish a national Swedish competence centre for SMR technology.

Construction of a new dam on the Göta Älv river in Lilla Edet was started in April. The current dam that will be replaced has parts that are over 100 years old and a water discharge function that needs to be improved. The new dam is planned to be completed in 2024.

### KEY FIGURES – POWER GENERATION

## Wind

The Wind Business Area is responsible for development, construction and operation of Vattenfall's wind farms as well as large-scale and decentralised solar power and batteries.

### Sale of 49.5% stake in Hollandse Kust Zuid to BASF

- Agreement on sale of 49.5% of the Hollandse Kust Zuid offshore wind farm
- All turbines installed at Kriegers Flak

**Q1–Q2:** Net sales increased by 2% compared with 2020. Underlying operating profit increased by 4% owing to higher electricity prices and new capacity, mainly from the Princess Ariane onshore wind farm in the Netherlands and the Kriegers Flak offshore wind farm in Denmark. This was partly offset by lower wind speeds. Electricity generation decreased by 8% due to lower wind speeds, which was partly offset by new capacity.

**Q2:** Net sales increased by 28%. Underlying operating profit increased as a result of higher prices for renewable energy certificates in the UK, higher electricity prices and new capacity, which was partly offset by lower wind speeds. Electricity generation increased by 5% due to new capacity, mainly from the Princess Ariane onshore wind farm in the Netherlands and the Kriegers Flak offshore wind farm in Denmark, which was largely offset by lower wind speeds.

At the end of June Vattenfall signed an agreement with BASF on the sale of 49.5% of Vattenfall's Hollandse Kust Zuid offshore wind farm in the Netherlands. The purchase price for BASF amounts to EUR 0.3 billion, based on the achieved status of the project. Including BASF's contribution to fund the wind farm

construction, BASF's total commitment amounts to approximately EUR 1.6 billion. Closing of the deal is expected in the fourth quarter of 2021, subject to approval by the relevant authorities. Construction has been started, and once fully operational, which is expected in 2023, this will be the world's largest offshore wind farm with installed capacity of 1.5 GW.

On 5 June the last of the total of 72 turbines were installed at the Kriegers Flak offshore wind farm in Denmark. The project is on schedule despite logistic challenges caused by the pandemic. The project is expected to be completed by year-end 2021 and will have capacity of 605 MW, corresponding to the annual electricity consumption of approximately 600,000 Danish households.

Vattenfall continues to make progress in solar energy and onshore wind power. For example, the Haringvliet hybrid park in the Netherlands began commercial electricity generation in mid-June. The project combines 38 MW of solar energy, 22 MW of onshore wind power and 12 MW of battery capacity, corresponding to the annual electricity consumption of 39,000 Dutch households.

## Heat

*The Heat Business Area comprises Vattenfall's heat business (district heating and decentral solutions) and gas-fired condensing plants*

### Higher sales of heat due to lower temperatures and a growing customer base

- Positive earnings impact from closure of Moorbург and higher sales of heat
- Permit and subsidies granted for e-boiler at Diemen CHP plant
- Investigation of opportunities to sell the Magnum gas-fired power plant

**Q1–Q2:** Net sales increased by 26% compared with a year ago. Underlying operating profit increased by 162% compared with the first half of 2020. The closure of the Moorburg power plant at year-end 2020 had a positive effect on underlying operating profit of SEK 0.8 billion, mainly as a result of lower operating costs and lower depreciation. Sales of heat increased as a result of lower temperatures and a growing customer base, which also had a positive effect. Compared with year-end 2020, the number of customers increased by 1.0% to the equivalent of 1.8 million households.

**Q2:** Net sales were 34% higher than a year ago. Underlying operating profit increased by 159% compared with the second quarter 2020. The closure of Moorburg had a positive effect on underlying operating profit, by SEK 0.5 billion, mainly owing to lower operating costs and lower depreciation. Sales of heat increased as a result of lower temperatures and a growing customer base, but were partly countered by negative effects of higher fuel prices, which resulted in lower clean spark spreads.

In June Vattenfall was granted a permit and subsidies to build a 150 MW Power-to-Heat boiler at the Diemen combined heat and power (CHP) plant in Amsterdam. The final investment decision is scheduled for mid-2022. The e-boiler is expected to be the

largest in Europe once commissioned in 2024 and will be run exclusively on renewable electricity.

Vattenfall is investigating opportunities to sell its Magnum gas-fired power plant in the Netherlands. The sale is being considered as the heat business is focusing on district heating and assets with a specific role in heat supply.

In May the final investment decision was made to build a system for sustainable district heating and district cooling in the new Sluisbuurt urban neighbourhood development project in Amsterdam. The project is being conducted by Westpoort Warmte, a joint venture company owned by Vattenfall and the City of Amsterdam. The first phase of the project will comprise 400 apartments, 700 student housing units and 6,750 sq. m. of commercial space, with construction start planned for late 2021.

After the end of the quarter, on July 5, the Higher Administrative Court in Berlin finally ruled that the city of Berlin has no right to take over Vattenfall's heat grid in Berlin. This decision puts an end to the legal proceedings that have been ongoing since 2014.

## Distribution

The Distribution Business Area comprises Vattenfall's electricity distribution operations in Sweden, Germany (Berlin) and the UK.

### Decision made by Swedish Parliament on special investment scope for electricity network investments

- Price reductions in the local network contributed to lower gross margin and earnings
- Decision by Swedish Parliament on use of unutilised surplus from preceding regulation period
- Sale of Stromnetz Berlin completed after the end of the quarter

**Q1–Q2:** Net sales increased by 5% compared with 2020. Underlying operating profit decreased by 16% as a result of lower gross margin in the Swedish operations, mainly due to price reductions in the local network and higher costs for the transmission network as well as an increase in network losses caused by higher electricity prices. This was partly offset by higher distributed volume due to colder weather.

**Q2:** Net sales increased by 2%. Underlying operating profit decreased by 21% as a result of a lower gross margin in the Swedish operations, mainly due to price reductions in the local network and higher costs for the transmission grid.

Expansion and upgrading of the electricity grid infrastructure are crucial for achievement of the climate targets and continued electrification of society. Vattenfall is participating in the Swedish Energy Commission's work on accelerating electrification of the transport sector and together with a number of other actors has drawn up electrification pledges for several regions to accelerate electrification of goods transports.

In April, Swedish Parliament decided on a special investment scope for electricity grid investments to contribute to investments in expansion of electricity grid capacity. The law applies for electricity network companies that have an unutilised surplus from the preceding regulation period 2012–2015 and took effect on 1 June.

Long lead times and drawn-out permitting processes for building electricity networks continue to pose a major challenge

for the energy transition in Sweden. During the spring the Swedish government decided in favour of the Council on Legislation legislative proposal "Modern permitting processes for electricity networks" ("Moderna tillståndsproucesser för elnät"), which entails improvements in several areas. However, considerably more radical measures will be needed in order for the electricity grid to be expanded and strengthened at a pace that society finds acceptable.

As a complement to investments in the electricity grid, Vattenfall is working with flexibility solutions to help alleviate bottlenecks in the electricity grid. During the winter season 2020/2021, the equivalent of 6,800 MWh in energy was purchased from electricity network companies in the EU-funded CoordiNet project that is being conducted in Uppsala, Skåne and Gotland. In this project, electricity consumers and electricity producers in areas with capacity shortages contribute to more efficient use of the grid by – in exchange for compensation – reducing their electricity consumption or ramping up their generation, respectively, to meet demand for capacity.

On 1 July the sale of Stromnetz Berlin, Vattenfall's electricity distribution business in Germany, to the City of Berlin was finalised. The purchase price was EUR 2.1 billion. The sale entails that more than 1,600 employees have obtained a new employer.

### KEY FIGURES – DISTRIBUTION

<b>Adjusted net debt<sup>2</sup></b>	<b>- 104 503</b>	<b>- 140 319</b>	<b>- 121 480</b>

1) Includes personnel-related provisions for non-pension purposes, provisions for tax and legal disputes and certain other provisions.

2) See Definitions and calculations of key ratios for definitions of Alternative Performance Measures.

3) 50% of Hybrid Capital is treated as equity by the rating agencies, which thereby reduces adjusted net debt.

4) The calculation is based on Vattenfall's share of ownership in the respective nuclear power plants, less Vattenfall's share in the Swedish Nuclear Waste Fund and liabilities to associated companies. Vattenfall has the following ownership interests in the respective plants: Forsmark 66%, Ringhals 70.4%, Brokdorf 20%, Brunsbüttel 66.7%, Krümmel 50% and Stade 33.3%. (According to a special agreement, Vattenfall is responsible for 100% of the provisions for Ringhals.)

## NOTE 1 | Accounting policies, risks and uncertainties

### Accounting policies

This interim report for the Group has been prepared in accordance with IAS 34 – “Interim Financial Reporting”, and the Swedish Annual Accounts Act. The accounting policies and calculation methods applied in this interim report are the same as those described in Vattenfall's 2020 Annual and Sustainability Report in Note 3 to the consolidated accounts, Accounting policies. Amended IFRSs endorsed by the EU for application in the 2021 financial year have no significant effect on Vattenfall's financial statements.

### Risks and uncertainties

For a description of risks, uncertainties and risk management, please refer to Vattenfall's 2020 Annual and Sustainability Report, pages 62-71. Apart from the information provided under “Business highlights” in this report and under “Business highlights” in previously published interim reports in 2021, no other material changes have taken place since the publication of the Annual and Sustainability Report

### Other

Significant related-party transactions are described in Note 44 to the consolidated accounts in Vattenfall's 2020 Annual and Sustainability Report. No material changes have taken place in relations or transactions with related parties compared with the description in Vattenfall's 2020 Annual and Sustainability Report. In addition to what is described in Note 30 to the consolidated accounts in Vattenfall's 2020 Annual and Sustainability Report, starting with the second quarter of 2021 an additional defined benefit pension plan in Germany is recognised as a provision on the balance sheet. The determining factor for this is changed actuarial assumptions regarding the risk for future deficits. The increased pension provision has been charged against other comprehensive income in the amount of SEK 2.4 billion, net after tax.

## NOTE 2 | Exchange rates

USD	8.5081	9.3720	8.1773

## NOTE 3 | Financial instruments by measurement category and related effects on income

For assets and liabilities with a remaining maturity less than three months (e.g., cash and bank balances, trade receivables and other receivables and trade payables and other payables), fair value is considered to be equal to the carrying amount. For Other shares and participations the fair value is approximated by using cost.

The carrying amounts of financial assets do not differ significantly from their fair values. The difference between carrying amounts and fair values for financial liabilities amounts to SEK 5,617 million (31 December 2020: 8,509).

Financial instruments that are measured at fair value on the balance sheet are described below according to the fair value hierarchy (levels), which in IFRS 13 is defined as:

**Level 1:** Quoted prices (unadjusted) in active markets for identical assets or liabilities.

**Level 2:** Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). In Level 2 Vattenfall reports mainly commodity derivatives, currency-forward contracts and interest rate swaps.

**Level 3:** Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

### FINANCIAL ASSETS AND LIABILITIES THAT ARE MEASURED AT FAIR VALUE ON THE BALANCE SHEET AT 30 JUNE 2021

Amounts in SEK million	Level 1	Level 2	Level 3	Total

<b>Total assets</b>	<b>78 170</b>	<b>26 922</b>	<b>500</b>	<b>105 592</b>
<b>Liabilities</b>				
Derivative liabilities	—	16 825	—	16 825
<b>Total liabilities</b>	<b>—</b>	<b>16 825</b>	<b>—</b>	<b>16 825</b>

## NOTE 4 | Items affecting comparability

Items affecting comparability include capital gains and capital losses from sale of shares and other non-current assets, impairment losses and reversed impairment losses and other material items that are of an infrequent nature. Also included here are, for trading activities, unrealised changes in the fair value of energy derivatives, which according to IFRS 9 cannot be recognised using hedge accounting and unrealised changes in the fair value of inventories

Amounts in SEK million	Jan-Jun 2021	Jan-Jun 2020	Apr-Jun 2021	Apr-Jun 2020	Full year 2020	Last 12 months
1) Including items affecting comparability	12 287	- 7 695	10 954	- 9 819	- 10 514	9 468
- of which, capital gains	41	215	- 7	214	301	127
- of which, capital losses	- 142	- 39	- 3	- 33	- 241	- 344
- of which, impairment losses	—	- 10 601	—	- 10 599	- 12 980	- 2 379
- of which, provisions	- 2 452	- 769	- 2 452	- 1 197	- 3 488	- 5 171
- of which, unrealised changes in the fair value of energy derivatives	2 745	2 989	2 267	2 021	4 753	4 509
- of which, unrealised changes in the fair value of inventories	156	- 277	318	253	476	909
- of which, restructuring costs	—	- 95	—	- 76	- 854	- 759
- of which, other non-recurring items affecting comparability	11 939	882	10 831	- 402	1 519	12 576

Items affecting comparability during the first half of 2021 amounted to SEK 12.3 billion, most of which pertains to result from sale of and compensation for Nuclear production rights in Germany (SEK 12.5 billion), and unrealised changes in market value for energy derivatives and inventories (SEK 2.9 billion). The increase in provisions pertains to the nuclear operations (SEK -2.5 billion). Capital gains and losses pertain mainly to smaller divestments in Business Area Wind (SEK -0.1 billion).

Items affecting comparability during the first half of 2020 amounted to SEK -7.7 billion. Most pertains to impairment losses for coal-fired power in Germany (SEK -10.6 billion) and unrealised changes in market value for energy derivatives and inventories (SEK 2.7 billion). The increase in provisions pertains to the nuclear operations (SEK -0.8 billion). Other items affecting comparability pertain to the sale of nuclear power production rights in Germany (SEK 0.9 billion).

### Result from sale of and compensation pertaining to Nuclear production rights in Germany Jan-Jun 2021

Billion SEK	Jan-Mar 2021	Apr-Jun 2021	Total
Sale of 10 TWh production rights in 2021	1.4		1.4
Compensation from the German government		16.6	16.6
Reversal of sold production rights 2019-Q1 2021		-5.5	-5.5
<b>Total</b>	<b>1.4</b>	<b>11.1</b>	<b>12.5</b>

# The Parent Company Vattenfall AB

## Accounting policies

The Parent Company Vattenfall AB's accounts are prepared in accordance with the Swedish Annual Accounts Act and recommendation RFR 2 – Accounting for Legal Entities, issued by the Swedish Financial Reporting Board. The accounting policies used in this interim report are the same as those described in Vattenfall's 2020 Annual and Sustainability Report, Note 3 to the Parent Company accounts, Accounting policies. New accounting policies applicable from 1 January 2021 has had no significant effect on the Parent Company's financial statements.

## January – June 2021

A condensed income statement and balance sheet for the Parent Company are presented below.

- Net sales amounted to SEK 20,286 million (25,223).
- Profit before appropriations and income taxes was SEK 1,979 million (9,663).
- The lower operating profit are mainly attributable to unrealized changes in market value for energy derivatives.
- The improved net financial items refers to dividends from group companies, mainly from Vattenfall NV.
- The balance sheet total was SEK 308,693 million (31 December 2020: 305,916).

- Investments during the period amounted to SEK 355 million (408),
- Cash and cash equivalents, and short-term investments amounted to SEK 52,993 million (31 December 2020: 53,043).
- Dividend paid to the owner of SEK 4,000 million (3,623).

## Presentation of Parent Company income statements

See Note 1 to the consolidated accounts, Accounting policies, risks and uncertainties.

## Risks and uncertainties

See Note 1 to the consolidated accounts, Accounting policies, risks and uncertainties.

## Other

Significant related-party transactions are described in Note 44 to the consolidated accounts, Related party disclosures, in Vattenfall's 2020 Annual and Sustainability Report. No material changes have taken place in relations or transactions with related parties compared with the description in Vattenfall's 2020 Annual and Sustainability Report.

# Definitions and calculations of key ratios

## Alternative Performance Measures

In order to ensure a fair presentation of the Group's operations, the Vattenfall Group uses a number of Alternative Performance Measures that are not defined in IFRS or in the Swedish Annual Accounts Act. The Alternative Performance Measures that Vattenfall uses are described

below, including their definitions and how they are calculated. The Alternative Performance Measures used are unchanged compared with earlier periods.

	Definition
EBIT:	Operating profit (Earnings Before Interest and Tax)
EBITDA:	Operating profit before depreciation, amortisation and impairment losses (Earnings Before Interest, Tax, Depreciation and Amortisation)
Items affecting comparability:	Capital gains and capital losses from shares and other non-current assets, impairment losses and reversed impairment losses and other material items that are of an infrequent nature. Also included here are, for trading activities, unrealised changes in the fair value of energy derivatives, which according to IFRS 9 cannot be recognised using hedge accounting and unrealised changes in the fair value of inventories. See Consolidated income statement for a specification of items affecting comparability.
Underlying EBITDA:	Underlying operating profit before depreciation, amortisation and impairment losses. This measure is intended to provide a better view on the operating result by excluding items affecting comparability that are of an infrequent nature, while also excluding non-cash depreciation and amortisation.
Underlying operating profit:	Operating profit (EBIT) excluding items affecting comparability. This measure is intended to provide a better view on the operating result by excluding items affecting comparability that are of an infrequent nature.
FFO:	Funds From Operations, see Consolidated statement of cash flow
Free cash flow:	Cash flow from operating activities less maintenance investments
Interest-bearing liabilities	See Consolidated balance sheet - Supplementary Information
Net debt:	See Consolidated balance sheet - Supplementary Information
Adjusted net debt:	See Consolidated balance sheet - Supplementary Information
Capital employed:	Total assets less financial assets, noninterest-bearing liabilities and certain other interest-bearing provisions not included in adjusted net debt. see Consolidated balance sheet - Supplementary Information
<b>Other definitions</b>	<b>Definition</b>
Hybrid Capital:	Perpetual subordinated securities, junior to all Vattenfall's unsubordinated debt instruments.
LTIF:	Lost Time Injury Frequency (LTIF) is expressed in terms of the number of lost time work injuries (per 1 million hours worked), i.e., work-related accidents resulting in absence longer than one day, and accidents resulting in fatality.

# Auditor's report

Vattenfall AB reg. no. 556036-2138

## Introduction

We have reviewed the condensed interim financial information (interim report) of Vattenfall AB as of June 30, 2021 and the six-month period then ended. The board of directors and the CEO are responsible for the preparation and presentation of the interim financial information in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

## Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements ISRE 2410, Review of Interim Report Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, ISA, and other generally accepted auditing standards in Sweden. The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Swedish Annual Accounts Act, regarding the Group, and with the Swedish Annual Accounts Act, regarding the Parent Company.
