- Good results despite challenging conditions
- Financial crisis had limited impact on earnings but price and credit risks have increased
- Vattenfall's geographic and fuel diversification has paid off
- Breakthrough of wind investments in the UK
- Increased debt but still very strong credit metrics
- Electricity generation for 2009 already 80% hedged
- Major progress for our CCS projects
- Further enhanced climate strategy

Our vision: A Leading European Energy Company

- At the end of July 2008, Vattenfall approached potential investors for the possible sale of our German Transmission operations (Vattenfall Europe Transmission GmbH)
- Indicative bids were received in October – high level of interest
- The intent to finalize a sale within the first half of 2009 is still valid – within this timeframe we remain flexible regarding single process steps and may adapt to external developments (e.g. regulation)
- Important criteria to be applied on investors. They must:
 - have a long-term focus
 - ensure substantial investments in network extension
 - grant continued free grid access for all power producers
 - promote the flow of electricity across European borders
- Final decision has not yet been made
