

*A spokesperson for Vattenfall said: "Vattenfall is aware of recent statements made by Wildcat Haven. These allegations suggest that Vattenfall attempted to suppress and conceal information relating to the existence of wildcats in respect to Vattenfall's Clashindarroch I Wind Farm site and that Vattenfall may have been involved in an ongoing police investigation relating to the recent removal of a wildcat from a private property in Wales.*

*"Vattenfall completely refutes these false and baseless claims made by Wildcat Haven and any possible suggestion of corporate fraud.*

*"When developing a wind farm, Vattenfall takes the environmental impact assessments very seriously, including the appointment of qualified experts to undertake surveys and detailed assessments of our developments to ensure that the local environment and wildlife are protected."*
