

Skills and Training

Building more than just skills and confidence

Pen y Cymoedd Wind Farm Community Benefit fund awarded £276,265.00 to the Community Impact Initiative for their Building Resilience in Communities Project (BRiC).

Building Resilience in Communities is supporting between 100-130 marginalised individuals aged 16+ over a 3-year period from across South Wales to improve their health and wellbeing, develop their personal, practical and employability skills and achieve accredited qualifications that help them move closer towards the labour market.

BRiC regenerates empty properties in these communities and returns them to the housing market, reducing empty property numbers and reducing the effects of antisocial behaviour, crime, and vandalism.
